ABT SECURITY SYSTEMS

FACIAL RECOGNITION WITH PRIVACY BY DESIGN

Protect Your Venue. Protect Your Patrons.

The Gaming & Hospitality Challenge

The Gaming & Hospitality Challenge
Venues must identify and act on self-excluded patrons across multiple entry points, high foot traffic, and rotating staff. Manual processes are no longer sufficient.

Responsible Gambling Meets Privacy Risk
Self-exclusion data is sensitive information. Mishandling it creates serious compliance exposure under the Privacy Act and gaming regulations.

The ABT Security Solution

ABT Security delivers facial intelligence technology and governance frameworks purpose-built for licensed venues.

- **Enforce Self Exclusion:** Identify self-excluded patrons in real time and support compliant, welfare-first responses.
- **Protect Staff & Patrons**: Flag individuals with a documented history of violence or harmful behaviour.
- **Deploy With Confidence**: Full alignment with Australian Privacy Act 1988 and 2024 Amendment Act.
- **Maintain Ethical Standards**: Privacy-first governance frameworks designed for gaming environments.
- **Human-in-the-Loop:** Technology informs decisions. Trained staff make them. Always.

AHA/ClubsNSW Code of Conduct ABT PIA Builder

A cornerstone of our solution is our Privacy Impact Assessment, a (PIA), an AI-enabled, structured assessment tool based on the requirements of the AHA/ClubsNSW Code of Conduct that identifies, evaluates and mitigates privacy risks when personal information is collected, used, or disclosed. ABT Security offer our PIA build tool to save time and money to develop a Privacy Management Program ready for legal ratification and adoption of our ethical facial recognition platform. It provides:

Strategic Oversight
Guidance on lawful facial intelligence deployment aligned with gaming & privacy laws

Step-by-Step Operator Instructions
Privacy configuration, data retention, biometric handling

Equality, Accuracy & Proportionality
A framework to ensure fair and defensible facial recognition use

Multi-Jurisdictional Compliance
Aligned with Australian Privacy Act 1988, 2024 Amendments, and evolving gaming legislation.

Why ABT Security Systems

NIST-Recognised Accuracy
Industry-leading facial recognition algorithms validated against global benchmarks.

Built-In Privacy Safeguards
Face blurring, signature-only storage, consent controls, and automated data deletion.

Australian Regulatory Alignment
Privacy frameworks designed specifically for Australian law and gaming compliance.

Secure by Design
Role-based access, secure architecture, and full audit trails.

Real World Applications

Self Exclusion Enforcement
Identify individuals on BetStop or venue-based self-exclusion registers and act in real time.

Staff & Patron Safety
Alert teams to individuals with a history of violence, threats, or harmful behaviour.

Comprehensive Governance & Consultancy

End-to-end guidance ensuring your facial intelligence deployment is lawful, compliant with gaming regulations, and aligned with responsible gambling obligations from day one

Privacy Impact Assessment (PIA)
We guide you through comprehensive Privacy Impact Assessment and governance framework, meeting gaming and Australian privacy requirements while identifying risk mitigation strategies.

Governance Framework Design
Establish executive oversight, accountability, and clear policies for register management and operational conduct.

Technical Configuration
Configure privacy settings, data retention, and biometric handling aligned to your venue's compliance and operational requirements.

Ongoing Compliance Support
Training for human decision-makers, audit trail maintenance, policy reviews, community engagement guidance, and regulator consultation support.
